The next test will go over linear selection and sorting, as well as recurrences:

http://beastie.cs.ua.edu/concepts/cs/al

I will be adding more questions over the weekend.

Is this the one listed on the syllabus for March 10?

No, this is a quiz.

When will the next quiz be?

We'll do the recurrences quiz first. We'll set a date in class tomorrow.

That quiz has almost all of the questions (but not all of the answers, yet).
Where can we find the answers for the practice quizzes?

Nowhere

The quiz next week will be on linear selection and linear sorting right?

That is correct. On Thursday.

Also if we have the ebook version do we need to show you the receipt before or after class? And are we allowed to only bring one sheet, or can we have multiple sheets?

Only the self balancing trees test is open book and only for the red-black tree and AVL tree algorithms.
Thursday's quiz will go over self-balancing trees:

http://beastie.cs.ua.edu/concepts/cs/al/sbtrees.html

Was in the hospital yesterday getting routine blood work done so missed class. Will there be an amortized analysis quiz tomorrow (Thursday) or will we not have another quiz until after the midterm next Thursday on 10 March?

No quiz tomorrow. The test is next Thursday

The test will include amortized analysis. You can ask questions on Tuesday.

Is the heaps quiz tomorrow, or next week sometime? The practice quiz page is only showing up as having 2 questions, not sure if that's on my end though.

I'll be adding questions through the weekend (I've added a few already). Heaps quiz Thursday next.
When and what will be our next quiz?

Probably Thursday next.
