Subject: Task 1 quotes  
Posted by eadwyer on Mon, 07 Nov 2016 23:02:07 GMT

Just for clarification, when the assignment says "Note: a symbol anywhere in the body represents a variable if it is not wrapped in a call to quote", does that mean to discard the stuff wrapped in quote but quote itself is a variable?

I would say yes. This is also makes the assumption that you don't redefine quote.

I won't do anything so nasty as making quote a local variable.
