A new version has been uploaded (version 3).

It fixes the return types for sizeSLL and sizeDLL. It also adds the methods sizeStack and sizeQueue.

Newest version is #4.

Adds the function signatures of getSLL and getDLL.

Newest version is #5.

Uses the correct name for showStack in the example stack testing code.

In your sample SLL/integer tester, it seems there is one too many parentheses

... showItems(items);
int x = getInteger((integer *) getSLL(items,0)));  //get the first item
printf("The first item is %d.\n",x);
...
Thanks. I've fixed the assignment and uploaded it.
