A ROUGH DRAFT is now available.

Odd thing happening to me... In Chrome on OS X, the link to assignment 3 on the beastie site still links to tbd.html. However, on Safari, as well as Chrome on Android, it links to the correct site... I dont know why this is happening. Anyone know why? Its not detrimental or anything... Just weird...

Even if you refresh the page?

Yep... I even closed the browser and reopened it... Its working now, though. Who knows...

If this problem reoccurs for anyone, dump the browser's cache.
