Subject: How much time is allowed for Shakespeare #33 test?
Posted by josephmalafronte on Fri, 17 Mar 2017 18:30:10 GMT

I failed this test due to timeout error. Upon running it on my own computer I got the right answer after the program runs for 90 seconds. I was curious what the timeout for this test is.

Four seconds. Since the tree is balanced, each insert should take nearly constant time.
